

Senior Mobile App Developer in Houten (full-time)

PalmSens BV develops, produces and sells portable electrochemical measurement devices and modules for the international market. We develop custom devices and apps on demand for specific markets, like the food industry or point-of-care medical devices. In this case our instruments are used to analyze for example, food or blood samples for bacteria, viruses (like covid-19) or heavy metals in the environment.

The job

You will be working on developing new applications, based on our existing Core libraries, targeting different Operating Systems, including iOS, Android and Windows.

Your profile

You have:

- ✓ a relevant Bachelor's or Master's degree
- ✓ at least five years of relevant work experience
- ✓ a high level of knowledge with C#
- ✓ a passion for building well-designed, high-quality software using design patterns
- ✓ an eye for detail and identifying root causes of problems
- ✓ an interest to learn new technologies

It would be an advantage if you have:

- ✓ experience with Xamarin / C#
- ✓ experience with XAML and Selenium
- ✓ an eye for front-end designs

We offer

- ✓ a healthy salary and pension options
- ✓ options to work from home
- ✓ a high-end notebook and accessories
- ✓ an informal working environment

We are an established company with a strong market position. You will be part of an interdisciplinary team (hardware, software, and firmware) developing software for instruments used

5-7-2021

all over the world in various fields of research, including medical, food, wearables, environmental, and more. We encourage initiative and creativity and to keep yourself updated with the latest trends and technologies.
